Hilton hotel's garbage cans actually smaller than Pairs Hilton's Vagina.

Hilton garbage cans look like VaginasThe garbage cans at the Hilton are smaller than an average dwarf's vagina. WTF am I supposed to put in there? I can fit three bottles, I can of pop, and an empty packet of beef jerky. What kind of garbage is that. If Hilton were smart, they would put a 50 gallon trash bag and can in the middle of the room... Because you know we're going to make a mess.

Chairman William Barron Hilton stated in a late Tuesday phone interview, "Our vagina garbage cans our one of our most popular attractions at our Hilton Hotels", "We are committed to garbage cans; while vagina-looking, can also accommodate one liter of garbage."

When pressed about the incredibly small - incredibly vagina-like-looking garbage cans, Hilton stated, "A good vagina shaped Hilton garbage can should be able to handle anything you could throw in it... \$100 bills, coins, and chunks of pure gold."

We here at pleasegodno.com freakishly had a different idea about what to throw in the "vagina" dumpsters"

"I'm going to put trash in it", stated frequent traveler and vagina-shaped garbage enthusiast. It's really about the impossibly small vagina-like shape and size of the garbage can - it's about trying to throw things into it from more than 10 feet away."

"Our Vagina-shaped waste-baskets are not for throwing things away - they are for practicing real-life garbage-throwing into an actual sized human vagina."
